Education

Self-Taught

Java programming language

Self-Taught

Flutter Framework and Dart

Still Learning

Machine Learning and Artificial Intelligence

Profile

Self-taught from day one, determined and goal-oriented Software Developer aiming at solving problems by leveraging technology. I am very much equipped with a diverse and very promising skill-set. I am very much able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

I started from Java programming language and moved to Flutter and Dart so as to keep up with technology. I am working on some apps that will solve some problems in the education department in Africa. To make this enterprise work properly, I am learning Machine Learning and Artificial intelligence.

My aim is to be an all-around Software Developer proficient in various platforms that will bring cutting-edge solutions to Africa.

problem-solving skills.

Software Developer

Jan 2019 – Present

Self-Employed, Uppington

My other job which my passion is making apps for my clients, ranging from Mobile Apps, that is Android or IOS, to Desktop Apps (Windows) and Progressive Web Apps. I am also working on several personal projects too.

I am experienced with some cutting-edge development tools like the Flutter Framework, which is a cross-platform tool built by Google to build beautiful, responsive, and adaptive apps for any Operating System, and for any Device size.

One of the tools I use sometimes is the Wix Editor which is a platform to build websites that are well-integrated, secure, and aesthetic.
